

TWS earphones with 200 mAh charging case

SKU: MHTWSRASHBTB

The wireless earphones with an original and colourful design

Completely wireless

The **Rash earphones** are designed for those who want total comfort from a pair of earphones. Forget wires: these headphones pair with each other and with your **smartphone, tablet or laptop** in **wireless** mode. The **True Wireless Stereo (TWS)** technology ensures stable signal transmission even **10 metres away**. When the headphones are out of charge, you won't need a charger or electrical outlet: just place them inside the **200 mAh charging case** to **recharge the battery to 100% in 1 hour**. The only **cable** you need is the **USB-A - USB-C cable included** in the package to power the case when it too runs out of power.

The modern, artistic design distinguishes them from a standard headset

If you want a pair of earphones that also have an impressive design, the Rash are what you're looking for! The inspired, multicoloured design differentiates them from the usual earphones, so you can stand out at all times.

For music and calls: everything you need in one accessory

The integrated **microphone** not only lets you listen to music, but also lets you make **calls** and record voice messages. If you want to play/pause or change tracks, adjust the volume, answer/ hang up or reject a call and activate the voice assistant, you can use the integrated **touch buttons** on the earphones without having to touch the connected device.
