Wireless earbuds with ANC technology and LCD display

SKU: TEEARTWSDISPLBTK

Discover the wireless earbuds with Active Noise Cancellation and an integrated LCD display”

INTEGRATED LCD DISPLAY FOR EASY ACCESS TO ALL FUNCTIONS

Make the most of all the features of your wireless earphones thanks to the **integrated LCD display**. You can easily set a timer, change the display background, activate the voice assistant, select your preferred language (Italian, English, French or German), adjust the volume, or even take photos remotely: just use the earphones’ case as a shutter. Never lose your earbuds again thanks to the **Find My Earphone** function: simply activate it on the LCD display. You can also switch between ANC and Transparency modes, or set your preferred equalisation.

TOUCH CONTROLS ON THE EARBUDS

With just a few taps on the earbuds, you can access many functions: pause or skip a track, adjust the volume, answer/end/reject a call, or activate the voice assistant. You can also switch the ANC function on or off, select the **transparency mode** or activate the **gaming mode** for a fully immersive experience while enjoying your favourite games.

OPTIMAL SOUND FOR ALL YOUR LISTENING

Easily choose the equalisation that best suits what you're listening to: whether it’s rock, pop, jazz or classical music, simply select the most suitable preset audio profile directly from the display.

NOISE REDUCTION FOR WHEN YOU NEED TO FOCUS

If external sounds distract you, block them out by enabling **Active Noise Cancellation (ANC)**: thanks to ANC technology, you can enjoy your favourite music even in the busiest environments. Alternatively, activate the **Transparency Function** to filter external sounds without cutting them out completely, ensuring safe listening without compromising audio quality. Clear sound is also guaranteed during calls thanks to the **ENC (Environmental Noise Cancellation)** technology built into the microphones: ambient noise is filtered out so that the person on the other end of the line **can hear your voice clearly without background interference**.

UP TO 30 HOURS OF BATTERY LIFE AND STABLE SOUND EVEN AT A DISTANCE

Enjoy your favourite music or podcasts all day long: these wireless earbuds offer 5 hours of playtime, and with the case you can charge them in about an hour and reach **up to 30 hours of total battery life** before needing to recharge the case. Thanks to the Hall Switch, the earbuds will automatically connect to previously paired compatible devices as soon as they are removed from the case, and once connected, the connection will remain stable and they will **keep playing even up to fifteen metres away** from your device, without compromising connection stability or sound quality, thanks to True Wireless Stereo technology.

WHAT MAKES THEM UNIQUE

- Wireless earbuds with ANC, Transparency Function and ENC technology
- Integrated display for easy access to all functions
- Connect up to two devices simultaneously
- Up to 30 hours of battery life with the charging case
- Touch controls directly on the earbuds

WHAT'S IN THE BOX

- Earbuds
- 3 pairs of silicone earcups
- USB-A to USB-C charging cable
