20W Wall Charger Kit, suitable for MacBook Neo

SKU: TEKITTRPDCCK

PD 20W charger + USB-C/USB-C cable

CHARGING ON THE GO

In a hotel or on the train, as well as at home: this ***20W travel kit*** is perfect for charging your devices quickly and conveniently. Wherever you are, you can be sure your devices will always have power.

ULTRA-FAST

The charger connects to a wall socket thanks to the European-type plug. The USB-C output features **Power Delivery** technology: this solution allows you to power iPhones or all PD-compatible smartphones, tablets and iPads in ultra-fast mode. Thanks to its power of 18 watts your device will be **fully charged in about 30 minutes***.

CHARGEx2

You can power two devices simultaneously using the **USB-A 2.1A** and **USB-C** outputs, whether Android or iOS. In this case, the USB-C port will not go into PD mode but will still ensure fast charging.

USB FAST

The USB-A port, which on its own delivers a maximum power of 18W, features the **Adaptive Fast Charge** system. This technology enables the power supply unit to automatically recognise the maximum charging power your device can receive and adjust it accordingly, thus supplying power quickly. Using just this output, your device will reach **50% charge** in just 30 minutes*.

MULTI-USE CABLE

1.5m long, the **USB-C/USB-C anti-kink cable** is very pliable. It supports Power Delivery technology and is ideal for powering MacBook, Samsung, Huawei, Nintendo Switch or all other smartphones and tablets with USB-C ports. It can also be used to **transfer files between devices**: for example, holiday videos and photos on different media.

FEATURES:

- 1 USB-C output with 20W Power Delivery technology
- 1 2.1A USB-A output with Adaptive Fast Charge
- European plug
- Smartphone charge level after 30 minutes with USB-C Power Delivery: 100%*
- Smartphone charge level after 30 minutes with USB-A: 50%*

- Cable with USB-C/USB-C connectors
- Cable for charging, data transfer and synching
- Cable length: 150 cm

*The values shown refer to a smartphone with a battery of 2500 mAh with a 20% residual charge and on standby; charging performance is greatly reduced with phone on and in use. Charging time may vary depending on the phone model.
